features

12 techtrends By Nancy Spurling Johnson
Extend the Reach of Product Information to the Enterprise
PLM systems make good use of product development information — if they can capture it. New SharePoint-based solutions bring elusive data into the fold.

16 cadalystlabsreport By Ron LaFon and Nancy Spurling Johnson
CAD to Go: Workstations on the Move
Tackle graphics-intensive tasks wherever work takes you! The newest mobile workstations rival desktops for powerful processing and massive memory. Our report includes First Look reviews of new Boxx and Lenovo units.

columns

AutoCAD 2011: A Few of My Favorite Things
Look beyond the high-profile changes in this release to find some small wonders that are a big help.

34 userprofile By Nancy Spurling Johnson
Meet the New Hot Tip Harry
They're big shoes to fill — not to mention the trench coat — but R.K. McSwain is on the case, with CAD tips for all.

cadalystlabsreviews

24 firstlook By Robert Green
Autodesk Inventor 2011
A good 3D mechanical CAD product gets even better with direct manipulation and input, a materials library, and a new tool that makes part assembly a snap. And don't forget the best feature of all: ease of use.

26 firstlook By Ron LaFon
Contex XD2490 24" Scanner
With its fast operating speeds and easy-to-use software, this compact unit is a smart choice if your documents are D-size or smaller.

27 userreview By Mark A. Donohoe
Bonzai 3d v2
Descended from the Form.Z modeling and rendering solution, this 3D solid modeler from AutoDesSys offers must-have features and a short learning curve.
