

# cadalyst contents

Fall 2010 www.cadalyst.com

## features

- 14** **techtrends** By Jim Romeo  
**Banking on Green**  
For companies such as Yakima, lifecycle assessment is the key to reaching the double bottom line: planet *and* profits.
- 18** **cadalystlabsreport** By Nancy Spurling Johnson  
**Seeing Is Believing**  
Gone are the days when design visualization required special hardware and expertise. Now it's faster, easier — and more vital to design — than ever before.

## columns

- 32** **cadmanager** By Robert Green  
**CAD Manager's Survey 2010**  
The recession's impact on your duties and paycheck might have you longing for the good old days, but there's some positive news this year: It could be worse.
- 36** **circlesandlines** By Lynn Allen  
**AutoCAD for Mac Is Back!**  
After nearly two decades, Autodesk delivers on its promise of a *bona fide* Mac experience with a native application. But does it include your favorite features?
- 38** **userprofile** By Cyrena Respini-irwin  
**Designing to His Own Beat**  
Whether strumming basslines or shaping basswood, Dale Meiners is always guided by creative flair.

## cadalystlabsreviews

- 26** **firstlook** By Ron LaFon  
**Xi MTower PCIe**  
This is no ordinary quad-core workstation; it's the Usain Bolt of desktops. The @Xi Computer powerhouse clocked in with the fastest performance to date at Cadalyst Labs.
- 28** **firstlook** By Ron LaFon  
**RenderPRO12**  
Dreaming of a render farm to handle your heavy lifting? If you have the cash and the space, great. If not, consider a dedicated rendering module from BOXX Technologies.
- 30** **firstlook** By Ron LaFon  
**Cintiq 21UX**  
Wacom's redesigned pressure-sensitive display is a natural for hands-on creative types — it's highly responsive, it provides immediate feedback, and it "just feels right."

**On the cover:** Christopher Sikora invented, modeled, and rendered the NAGA Port, a surgically implanted intravascular access device for delivering chemotherapy drugs, when his son was battling cancer. He modeled it using Punch ViaCAD 2D/3D v6 and rendered the cover image using Punch Shark FX v5. Sikora's rendering was the winner of Cadalyst's Call for Renderings contest, sponsored by BOXX Technologies.

**Cover art direction:** Gwen Thomsen Rhoads
