

We Recommend Desktop Virtualization

Access Files from Any Device

Access to personal desktop from standard PCs, thin clients, and tablets

High performance and reliability over LAN, WAN, WiFi, and 3G/4G networks

Virtual experience for CAD/CAM users equals that of a traditional workstation

CAD users can view, mark up, and edit instantly, regardless of file size

Tighter data security, yet easier and faster file access

for the CAD User

Work from Any Location

Fully functioning 3D software accessible from office, field, hotel, or home

Collaborate Efficiently with Any Team Member; Log In Any Time

Real-time collaboration among team members near and far

Round-the-clock file availability to support follow-the-sun development

Accelerated design cycles that result in happy customers, successful companies

Citrix XenDesktop with HDX 3D Pro is the remedy for what ails you and your fellow CAD users. Desktop virtualization with Citrix XenDesktop means any user can access files from any device and any location, and HDX 3D Pro means you won't have to compromise your experience with graphics-intensive 3D software such as CAD, simulation/analysis, and visualization.
