Lenovo™ ThinkStation® P Series and ThinkPad® P Series

ThinkStation | ThinkPad

Why Lenovo

Lenovo focuses on power, performance and reliability in every machine we design; both ThinkStation and ThinkPad. By combining the absolute top-of-the-line components with groundbreaking designs, we are able to push our systems harder and have raw power necessary to handle the most demanding workloads. Absolutely key for a top performing workstation is the ability to keep it's components cool. This is where our innovative Tri-Channel cooling in our towers and FLEX Performance cooling in our notebooks comes to fruition. These revolutionary designs allow CPUs and GPUs to run at peak performance until the job is done while simultaneously keeping the components cool which makes for long lasting and reliable machine.

Lenovo Workstation Design Philosophy

Architects, product and software designers, financial traders, medical professionals and engineers - all need high performing, easy-to-use, reliable power to get the job done. Lenovo workstations deliver the highest levels of performance, ease of use and reliability. Lenovo ThinkStation P Series are designed from the ground up for reliability and ease of use. With our ingenious modular design, making upgrades and customizations is effortless and supports a staggering number of possible configurations. The combination our ground-breaking design with the latest Intel® Xeon® CPUs and NVIDIA® Quadro® GPUs delivers to our customers the absolute best possible user experience to turn ideas in to reality.

The Lenovo ThinkStation P Series are the best designed workstations ever. The ThinkPad P Series are mobile workstations that grant freedom from the desk while keeping productivity high. Designed for unmatched usability, superior reliability and unparalleled performance. The ThinkPad P Series offers the full range of mobile workstations from the thin-and-light mobile workstation meant for users constantly on-the-go to the mighty and powerful 17-inch P71. They are certified to run mission-critical ISV applications and are MIL-SPEC tested for durability to last.

Perfect for:

- Engineers • Financial Professionals • Game Designers • Healthcare and Life Sciences • Animators • Energy and Oil & Gas

Powerful Intel® Xeon® Processors

Lenovo workstations combine the latest high-performance Intel® Xeon® processors, featuring unmatched performance and multicore processing efficiency. Like all Think-branded products, our Lenovo workstation computers boast innovation and design excellence, while delivering quiet, reliable, and powerful solutions for your work environment. The Lenovo workstation's powerful Intel® Xeon® CPUs offer:

- 24/7 uninterrupted performance
- ISV certifications for maximum reliability and performance
- Intel® Dynamic Power Management, offering better performance per watt
- Intel® Turbo Boost Max Technology 2.0, delivering extra power when you need it
- Advanced Intel® Virtualization Technology

Performance Graphics

Lenovo workstations deliver powerful graphics needed for professional applications—from 2D and 3D content creators, to users of CAD and EDA applications, to finance and medical professionals. Powered by NVIDIA® Quadro® and NVS graphics, each workstation is built to maximize your productivity so you can do more in less time. Professional graphics cards also offer longer life cycles and much more reliability than their consumer counterparts and come with certified and optimized drivers from leading software vendors for a truly enhanced experience.

Think Innovation

Lenovo workstations provide an innovative answer for challenges such as thermal management, higher levels of component support and an intuitive design.

All Lenovo workstations offer unique thermal designs engineered for maximum cool air delivery to key components, reducing the risk of hardware failure. Lenovo workstations are also whisper-quiet. The new intuitive and tool-less design makes performing upgrades easier than ever.

ISV Certified

Every workstation is ISV (Independent Software Vendor) tested and certified to ensure maximum compatibility and performance. Certification means that should you ever require support on the specialized applications you use every day, the ISVs will be ready to help. Only a certified workstation-class product is eligible for this level of support.
